

# ANAYAT ULLAH

## Junior Frontend Engineer

+92-325-5940812 • anayatullahbutt189@gmail.com • <https://www.linkedin.com/in/anayat189> • Islamabad, Pakistan

## Summary

Results-driven Frontend Engineer with hands-on experience in building scalable and responsive web applications using ReactJS and NextJS. Proficient in modern UI/UX development with Tailwind CSS and efficient state management using Redux Toolkit. Complemented by extensive teaching experience across Matric to Bachelor levels, demonstrating strong communication, mentoring, and leadership abilities. Passionate about delivering high-quality, user-centric solutions while collaborating effectively in dynamic, cross-functional environments.

## Experience

- 

**Iqra University (Official)**  
Junior Lecturer – Software Engineering & AI Department  
Teaching and mentoring undergraduate students in Software Engineering and Artificial Intelligence.
  - Assisted in curriculum planning, assignment design, and academic assessments.
  - Mentored students on projects, problem-solving, and practical implementations.
  - Collaborated with faculty to improve teaching methodologies and course content.

Islamabad, Pakistan  
04/2026 - Present
- 

**Datalytics AI**  
Junior Frontend Developer  
Developing responsive UI using React Js  
Fixing bugs and improving website performance  
Converting Figma/Designs into clean code

Islamabad, Pakistan  
12/2025 - 01/2026
- 

**Discretelogix**  
Software Engineer Intern  
A software development company specializing in innovative tech solutions
  - Developed and maintained scalable frontend components using React-Js and Typescript, following clean code and best practices
  - Built modern and responsive user interfaces for an (Nuvano) Event Management System using Ant Design (AntD)
  - Implemented global state management using Redux Toolkit to handle complex application states efficiently
  - Collaborated with cross-functional teams to integrate REST APIs, ensuring seamless data flow and smooth user experience

Islamabad, Pakistan  
06/2025 - 09/2025
- 

**University of Gujrat**  
Teaching Assistant  
Assisting in teaching Programming Fundamentals, OOP, ICT, Data Structures, and Web Technologies.  
Guiding students in understanding core programming concepts and problem-solving techniques.  
Supporting lab sessions, assignments, and academic activities.

Islamabad, Pakistan  
09/2024 - 12/2024
- 

**Eziline Software House Pvt Ltd**  
Frontend Web Intern  
A software house focusing on web development and design
  - Developed and enhanced website components using ReactJS and Tailwind to build modern, responsive user interfaces
  - Designed and optimized reusable UI components for Eziline official website, ensuring consistency and performance
  - Collaborated with the team to implement design requirements and improve overall user experience

Islamabad, Pakistan  
01/2024 - 04/2024
- 

**ACC Coaching center**  
Teaching Instructor  
Teaching computer and programming subjects to Matric, Intermediate, and Bachelor level students.  
Explaining concepts in an easy and practical way to improve student understanding.  
Preparing course material, assignments, and managing classroom activities.

Rawalpindi, Pakistan  
11/2020 - 03/2026

## Education

- 

**University of Gujrat**  
Bachelor's in Information Technology CGPA: 3.31

Rawalpindi, Pakistan  
08/2021 - 06/2025

## Key Achievements

|                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>Improved Student Learning Outcomes</b><br>Simplified complex programming concepts to enhance students' academic performance & practical understanding |  <b>Enhanced Problem-Solving &amp; Debugging Skills</b><br>Trained students to effectively identify & fix coding errors while developing strong logical thinking & structured coding practices |  <b>Developed &amp; Delivered Practical Web Projects</b><br>Guided students in building real-world projects using modern web technologies, bridging the gap between theory & industry skills |
